DETAILED ACTION

Response to Amendment

1. Applicant has amended such a way to overcome the rejections set forth in the previous rejection. However, upon a review of claim 3 (originally filed claims 1 and 3 combined), the claimed invention appears to be non enabling as explained below. It is regretted that an indication of allowability of the claim appears to be premature. The finality of that action is withdrawn and this Office action is made non-final.

Claim Rejections - 35 USC § 112

2. Claims 3,4,6,7 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The specification fails to disclose a communication embodiment where “a whole spectrum inverter” and “a partial spectrum inverter” are employed together for retransmission of received signals from a plurality of handsets.

Allowable Subject Matter

3. Claims 8-17 are allowed.
